HAVANA, Oct. 8.-The escape of Senorita Evangelina, Cassio, otherwise Cassio Y. Cineros (exclusively reported in al cablegram to the Associated Press last night) has caused quite a sensation in

Havana.

The investigation made by the authorities has developed a number of additional facts in the case. It is now asserted that the young woman escaped between 11 o'clock and midnight of Wednesday, over the roof of a neighboring house and through it to the street below O'Farrell lane, and not in the street below O'Farrell have, and not in the street below O'Farrell with the found a hand ladder.

Stimson charges Gibson with passing a fraud ulent check for \$640 on the hotel, besides swindling them out of \$265 for board. His swindles, it is alleged, amount to about \$400,000. Gibson is a lawyer by profession and is thirty-nine years old. As a promoter he consolidated the Akron, Ohio, street railway company, and at present is said to be the vice president of the corporation. the vice president of the corporation. Gibson was held in \$1,000 ball, and his examination fixed for October 12. He declared that he was entirely innocent of the charge. Papers were served on Gibson to-day for contempt of court in supplementary proceedings brought in January last, by the Pittsburgh National Bank, which holds his note for \$2,000.

PITTSBURGH, Pa., Oct. 8.—Emmet C. He was connected with several very rich men and rumor has it that he had a draft for \$3,500 cashed by one man, and the gentleman who was the victim lost the money, rather than have it known that he had been the victim.

About three years ago Gibson drifted into Pittsburgh. He had a letter of introduction to George Sheppard, treasurer of the Pittsburgh Bank for Savings, and Mr. Sheppard introduced him to a number of people.

One day Gibson met State Senator Magee, who was then president of the Duquesne Traction read. He had a scheme to consolidate all thy street railways in Pittsburgh. This was Mr. Magee's fond hope, but he had been so busy that he did not have time to work the meter up. Gibson fold Senator

He asked nothing for his services unless he consummated the deal. To the surprise of almost every one, Gibson got all parties together and the consolidated traction company was formed. Gibson made, it is alleged, \$50,000 out of this deal, and was elected one of the directors of the consolidated traction company. CHICAGO, Oct. 8.-The evidence of the prosecution in the trial of Adolph L. Luetgert, is now before the jury. The state rested its case this afternoon. The closing testimony was of the same impeaching character that marked the evidence of the preceding day.

Professor George Dorsey had his innings during the afternoon session of court, and he made matters unpleasantly warm for Dr. Allport. Professor Dorsey could have talked for hours upon the subject of osteology. He was primed with bristling facts concerning bones, but the prosecution confined the yours osteological expert to matters

Professor Dorsey called attention to the fact that during his examination Dr. All fort had identified the femur of a gorilla as that of a man; that he had identified a human femur as a hog's femur; had declared that the sesamiol of a buffalo was the patella of a dog, and had given it as his opinion that a piece of the temporal bone of a shepherd dog was the temporal of a monkey.

Dr. Allport listened to this evidence with a half incredulous smile playing upon his lips. But the evidence was not productive of anything bordering upon merits with the attorneys for the defense, Ex-Judge Vincent Cross ex-

NEW YORK, Oct. 8 .- R. G. Dun & Co.'s weekly review of trade will say in its issue to-morrow:

While failures were the smallest ever known in any quarter since 1892, and business payments through banks the largest by \$268,000,000 ever known in September, the specluators who profess anxlety about Cuba, or fever at the south, or a municipal election, still have some influence. Helping them just now is the fact that after extraordinary purchases for replenishment of stocks from any section or town there must necessarily be for a time less buying from that quarter. Yet business is still increasing, the productive force teadily enlarges, the distribution of

teadily enlarges, the distribution of wage affords an increasing fund for purchases, and the foundations are laid for a larger business hereafter. The week's exchanges are 8.8 per cent larger than in 1892.

Crop reporters, who have widely differed, now agree in putting the yield of wheat at about 580,000,000 or 590,000,000 more than will be required for home use, keeping stocks as they were July 1, the lowest for seven years. A foreign report indicate a larger demand, and exports since July 1 have been nearly as in the best past year, with 2,985,784 busheels from Atlantic ports, flour included, for the hus week, against 2,140,371 busheis last year; the recovery of 1½c la cluded, for the hast week, against 2,140,371 bushels last year; the recovery of 1½c in price for the week is not without reason. Western receipts continue to exceed last year's 8,00,221 bushels against 7,243,999 bushels for the week. With these favorable report of yield, corn exports fall short slightly, with small difference in price. Cotton is unchanged in price, with larger consuming demand, though big crop estimates do not appear to be disputed. A large increase in the production of

A large increase in the production of pig iron, and heavy realizing sales of lots held on speculation have caused a decline of 15c to \$10 60 for Bessemer at Pittsburgh, though grey forge there has advanced 15c, and pig iron is stronger at Chicago and eastern markets. But finished exclusive grow stronger, with a Chicago and eastern markets. But finished products grow stronger, with a demand outrunning the capacity of works in operation in many branches, so that delays in delivery are in sheets and tin plate bars emparrassing, and in some other branches orders cannot be filled within one or two months. Building of more vessels on the lakes and sea coast, heavy orders for sheets, bars, rods and pipes have caused advances averaging half of one per cent for the week on all classes, but the general gain is not yet quite ten per cent from the lowest point. Reports of combination in steel rails are denied, and it is said that only three large producers will agree on prices, while the rod and wire compact appears to be still in the future.

"This has nothing to do with the confidence felt in you by the government, for the Liberals have always said that the responsibility for a given policy does not fall upon times who carry it out, but upon the government inspiring it. I shall communicate your decision to the government shortly."
